

- What are the 3 basic technologies needed to run a website?
  - Web browser
  - Web server
  - Web pages
- What are local files? What are web servers? What is FTP and how are they related?
  - Local files: computer files such as, web pages or images
  - Web servers: a place that you upload your webpages to. The server then makes them available to the Internet.
  - FTP (File Transfer Protocol): a protocol for transferring files from one computer to another. It's also how you would put your website onto the Internet. You'd upload your website, composed of local files to a web server using FTP and wa-lah! You have a website that is available to other people.
